## PROJECTS

### Hostel Care

Technologies Used : HTML, CSS, JavaScript, React.js, Node.js, MongoDB.

Project Overview:

Developed a robust and user-friendly Hostel Management System to streamline administrative tasks and enhance operational efficiency. This web-based application provides a centralized platform for managing student accommodations, bookings, and hostel resources.

Key Features:

Student Management: Secure registration, login, and profile management for students.

Room Allocation: Automated room assignment based on availability and preferences.

Fee Management: Integration of payment modules for fee tracking and receipt generation.

Attendance Tracking: Record and monitor student attendance.

Admin Dashboard: Comprehensive control for administrators to manage rooms, resources, and complaints.
