EXPERIENCE SUMMARY:

THECODERWAY, Indore
[PHP Web Developer], [June 2023-Present]

- Developed and maintained web applications using PHP/Laravel/CodeIgniter
- Collaborated with other developers and stakeholders to ensure timely and successful project completion
- Implemented RESTful APIs for mobile application integration
- Optimized database queries to improve application performance
- Conducted code reviews to ensure code quality and maintainability
- Worked on front-end development tasks such as creating responsive designs and implementing user interfaces
- Participated in Agile development methodologies

Project Details:

1) Staffpage.com
   - Description: An HR Management Web Portal is a comprehensive tool designed to streamline and automate various HR processes. It allows for centralized staff management, tracking of attendance and leave, handling overtime requests, and managing holidays

- Role: PHP Developer
- Technologies: CodeIgniter 4.4 , Bootstrap and MySQL
- Payment gateways: Paddle/Stripe/PayPal

2) Store.redvsblue
    - Description: E-commerce Website
    - Role: Joiner developer
    - Laravel, Bootstrap and MySQL
    - Payment gateways: Stripe

3) School Managment
    - Description: Developed a school management software with multi-role login and role-based access control for secure, tailored user experiences. Integrated features like fee structure management, student/parent information, annual function details, and notice board to streamline school operations. Enabled automated fee payment reminders, exam scheduling, class timetable management, mark sheet generation, and session transfer for efficient workflow. Improved communication and data security by automating administrative tasks and providing role-specific access to key features.
    - Role: Full Stack developer
    - Laravel, Bootstrap and MySQL
