ABOUT ME

Experienced and passionate software developer with a strong problem-solving ability and a detail-oriented mindset. Skilled in building scalable applications and adapting quickly to new technologies. Adept at collaborating with cross-functional teams and staying up-to-date with industry trends. Committed to delivering high-quality code and exceeding client expectations. Dedicated to creating impactful and user-centric software solutions that make a positive difference.

CO CURRICULAR ACTIVITIES

- Solved various problems on the CodeChef platform.
- Participated in various coding competitions on the Newton School Platform.
- Part of college volleyball team during college days.
- Acted as an Event Coordinator during the annual Fest in college in 2020.

EXPERIENCE

SHIPYAARI(A.V.N BUSINESS) | FULL STACK DEVELOPER

Aug 2023 – Current | Mumbai, IN

- Enhanced server performance, cut wait time by 60 percent with the queue.
- Integrated PhonePe, Paytm, RazorPay, and JusPay for 100 percent seamless payments.
- Developed a custom logger solution for the Shipyaari Tech system, enhancing tracking and analytics across the organization.
- Work with a team and mentor 3 junior developers under me.
- Implemented Sentry for robust error tracking and monitoring, facilitating rapid identification and resolution of software bugs.
- Courier Partner Integration 7+ like Bluedart, Amazon, and IndiaPost, etc, Translate business needs into project requirements, ensuring seamless implementation.
- Developed and executed MongoDB queries, aggregations, and data manipulation operations to support application development and business requirements.
- Conducted performance analysis and optimization of MongoDB databases, identifying and resolving bottlenecks to improve query performance and resource utilization.
- Managed MongoDB databases across multiple environments, including development, testing, and production, ensuring high availability, performance, and security.
- Utilized MongoDB's index types, including single-field indexes, compound indexes, and multi-key indexes based on specific application requirements.
- Technology Used: Typescript, NodeJS, Chatgpt Api, ReactJS, Redux, Sentry ExpressJS, MongoDB, Redash, Redash, RabbitMQ, CI/CD, Jake.js Redis etc

MATERIAL LIBRARY | FULL STACK DEVELOPER

Aug 2022 – July 2023 | Gurgaon, IN

- Created fully responsive screens using React JS for different modules in the Materiallibrary web application as a MERN Stack developer.
- Created functionalities to make the website dynamic using React and JavaScript. Implemented authentication and authorization using JWT and OAuth2.
- Implemented message routing, queue management, and fault-tolerant mechanisms using RabbitMQ's features. Implemented efficient data caching and memoization techniques using Redux selectors for improved performance.
- Created more than 100 APIs for the app using NodeJS, MongoDB, Express, and Mongoose.
- Worked with S3 SDK and AWS services to deploy and maintain applications in the cloud.

NEWTON SCHOOL | FULL STACK DEVELOPER(INTERNSHIP)

DEC 2021 – Jun 2022 | Bangalore, IN

- Full Stack Web Development with problem-solving, Participated in various contests organized by the platform.
- Assisted in program development through planning, designing, creating, and testing. Created responsive design layouts using JavaScript, aiding smooth customer experiences.
