KEY PROJECTS

Councillor Smart-View (B2B Product) - Designed a lead management feature for education counsellors in small & medium-sized colleges, streamlining student application tracking from inquiry to admission.

- Created a feature for education counsellors, simplifying lead management. Improved navigation and UI consistency, ensuring better workflow efficiency.

Document Designer Connector- DDC (B2B Product) This connector pulls student data from portals using predefined templates created with DDC's drag-and-drop tool, allowing code-free form creation and reducing setup time.

- Designed a drag-and-drop form builder, enabling users to create templates without coding. Streamlined the UI, enhancing usability and reducing form creation time.

Outlook Connector (B2B Product) – This feature allows sales users to manage leads, update tasks, and post activities directly within Outlook, streamlining their workflow.

- Designed the UI for an Outlook add-in, ensuring seamless integration. Created interactive components in **Figma** and collaborated with developers for smooth implementation, improving task efficiency by 15%.

Pet Active - The App lets owners book trusted vets for home visits, connect with nearby doctors, and chat in real time for medication tips—avoiding unnecessary hospital trips.

- Designed an intuitive **mobile UI** for seamless pet healthcare booking. Optimized navigation, created high-fidelity prototypes, and ensured efficient developer handoff, leading to a **20% faster booking process**.

Edmocha - This app enables users to subscribe to courses, attend seminars, and join online classes. It offers corporate training, webinars, and virtual sessions with selected instructors for a personalized learning experience.

- Designed UI for an online learning platform, focusing on an engaging course subscription experience. Delivered pixel-perfect designs and ensured smooth collaboration with developers.

EDUCATION :
Bachelor of Fine Arts - CAVA (Chamarajendra academy of visual arts, Mysore University),
