

Dilip Kumar

Software Engineer | Full-Stack Development | Angular | React | Node.js | MongoDB

7667059780 dk837703@gmail.com 1234dilip Hyderabad

SUMMARY

Software Engineer with 3 years of hands-on experience in full-stack web development, specializing in Angular, React, Node.js, and MongoDB. Proven ability to design, develop, and maintain scalable, high-performance applications with a focus on responsive UI and seamless user experiences. Adept in modern front-end and back-end frameworks, and a collaborative team player passionate about building efficient, user-centric digital solutions. **Also, I am GATE Qualified in 2020.**

EXPERIENCE

Software Engineer

Trst01 09/2024 - 01/1970 Hyderabad

Trst01 is a technology company specializing in blockchain-based solutions for sustainability, transparency, and traceability across various industries including agriculture, supply chain, and climate tech.

- Developed and maintained full-stack applications using MEAN and MERN stacks.
- Conducted regular code reviews to ensure code quality, performance, and adherence to best practices.
- Collaborated closely with cross-functional teams to implement scalable features and improve application architecture.
- Optimized existing codebases, resolved bugs, and enhanced performance and user experience.

Software Developer – MEAN/MERN Stack

Ongraph Private Limited 08/2022 - 08/2024 Hyderabad

Ongraph Technologies is a global IT company providing end-to-end web and mobile app development using modern technologies across domains like healthcare, fintech, and e-commerce.

- Contributed to full-stack development of web applications using MEAN and MERN stacks.
- Assisted in refactoring legacy code and implementing new features with clean, maintainable code.
- Collaborated with UI/UX designers and backend teams to deliver user-friendly, scalable solutions.
- Participated in code walkthroughs, testing cycles, and agile ceremonies to ensure timely delivery.

Junior Software Developer – MEAN/MERN Stack

Techspawn Solution Pvt Ltd 03/2022 - 07/2022 Hyderabad

Company providing software development and IT services

- Built and maintained e-commerce web applications using Angular, Node.js, and MongoDB
- Collaborated in agile teams to ensure timely and quality deliverables

PROJECTS

MEES

meesdev.trst01.in

MEES is an end-to-end manufacturing system that manages the entire process of rubber production

- Developed front-end interfaces with Angular and backend services using Node.js for seamless production tracking.
- Implemented real-time updates for production and inventory status, ensuring accurate and timely information.

Ascenso Tyres - Manufacturing and Distribution System

ascensomees.trst01.in

Ascenso Tyres' system manages the end-to-end process of tire production, inventory, and distribution. It ensures efficient tracking and real-time data updates across global supply chains.

Role: Full Stack Developer

- Developed and maintained the front-end using Angular to provide a responsive and user-friendly interface for production tracking and sales reporting.
- Built backend APIs using Node.js to manage inventory, orders, and logistics, ensuring seamless data flow between the front-end and databases.

BCK MIS

bckmis.trst01.in

BCK MIS is an end-to-end system that manages the entire coffee production process, from raw material sourcing to manufacturing and sales. It streamlines operations and enhances decision-making across the supply chain.

- Developed front-end features with Angular and backend services using Node.js and MongoDB.
- Implemented role-based access control, production tracking, and inventory management
- Improved system performance through collaboration and optimization.

OnGraph Market Research Solutions

The OnGraph Market Research project focuses on developing a comprehensive, AI-powered platform for efficient market research

Role: Full Stack Developer

- Developed responsive UIs with **Angular** and **Node**.
- Connected with global panel providers via APIs for survey distribution.
- Integrated AI algorithms for targeting, fraud detection, and quota management.
- Optimized platform performance for scalability and high-volume data handling.
