- Android App Development
- Android Studio
- Version Control - Git
- Development Tools - Mantis/ JIRA/ Postman
- Android Jetpack Components
- Architecture - MVVM, MVP, MVI, Clean Architecture
- Firebase
- Multi-threading (Coroutines & Async)
- Unit Testing

- Kotlin & Java Language
- Material Design
- RESTful APIs Integration - Retrofit, Ktor
- Debugging & Troubleshoot
- Mapbox & Google Map SDK
- Jetpack Compose
- Database Management (Room & SQLite)
- External Libraries and SDK Integration and Customization

PROJECTS

GSP - Global Sustainability Portfolio (Ongoing)

- Developed an Australian-based application from scratch, focused on maintaining companies environmental sustainability portfolio.
- Utilized Mapbox and graphs to display global facilities and regions with interactive detail views on item click, leveraging properties like zoom, symbol, and annotation management for seamless navigation.
- Customized android concepts like BottomSheetView and BottomNavigationView to meet business goals.

OverZero

- Developed an Australian based online accounting application from scratch, aiming ease the accounting work like Xero in Australia. The application has different flows and UI based on roles like Bookkeeper, BusinessOwner, Mentor, Financial Broker, Principal Accountant and Principal Accountant Assistant.
- The application also offers chat and call. Chat was fully inhouse while for call we used Zego call sdk.

Intacept

- IntaCept Ltd is the holder of an Australian and International patent portfolio in field of electrical testing and tagging.
- Each tested electrical device was tagged with a NFC containing its data. Enabled seamless offline and online functionality using Room for local data storage, with automatic sync upon reconnection.

Other Support Projects

- Smart Rocket
- Dalal&Broacha
- Night Owl
- PEX, FBC, Afrasia

EDUCATION

B.Tech [2017-21]	Rewa Engineering College, Rewa	CGPA - 8.2
Sr. Secondary [2016-17]	Sacred Heart Convent School, Rewa	87.6%
