PROFILE

To contribute to a growth-oriented organization where I can apply my skills and knowledge in full-stack development, leading to job satisfaction and opportunities for professional development.

Motivated and results-driven MEVN Full Stack Developer with **2.9 years** of experience, seeking a challenging position within a large organization. Offering a strong foundation in web application development, database management, and client interaction, with a proven ability to deliver successful outcomes and collaborate within cross-functional teams.

WORK EXPERIENCE

Senior Associate Consultant

Jade Global Soft PVT LTD   2022 - Present

- Developed end-to-end web applications using the MEVN stack, including feasibility studies, architectural design, development, testing, and deployment.
- Designed, implemented, tested, and deployed MEVN-based solutions for medium to complex projects
- Shared best practices and technical knowledge with team members.
- Provided regular updates to clients on project progress and ensured project requirements were met.
- Interacted with clients, providing regular updates on project progress and ensuring alignment with requirements.

PROJECT DETAILS

Kanverse.ai

2022 - Present

Description -:

- Developed and maintained Kanverse, a Cognitive Automation Platform that enhances enterprise efficiency by streamlining processes and reducing manual tasks. Contributed to its decision-making engine, conversational interfaces, and seamless integration with enterprise systems of record

Responsibilities -:

- Developed both client-side and server-side applications using Vue.js, Node.js, and Express.
- Created and maintained RESTful APIs with Node.js to support robust backend services.
- Developed single-page application (SPA) interfaces with Vue.js for dynamic and responsive user experiences.
- Integrated client-side requests with the server using Kafka, Mocha, and Socket.io for real-time communication and reliable message processing.
- Interacted with customers to address and resolve issues related to the support portal.
- Worked with MongoDB to efficiently retrieve and manipulate data through REST APIs.
- Designed and implemented new features within the Kanverse platform, contributing to its continuous improvement and enhancement.
