EXPERIENCE

JOB POSITION	Associate Director PMO (Delivery)
COMPANY	CredAble.in (July 23 – Till date)
PROGRAM/PROJECT TITLE	DDRX, DFX, Kotak, Escorts Kubota, Karnataka Bank

DESCRIPTION:

Supply chain financing (SCF) platform. Capital finance to dealer / suppliers having business relationship with large corporates (anchors). To optimize working capital requirement of both the parties. Supply chain finance is fine blend of discounting & overdraft product with the essence to optimize finance and flexibility for the customer. All transaction is linked to a base document (invoice) between the customer and counter party. The solution is a cloud-based solution integrated with the banking system following proper ADID integration.

Spearheaded the frictionless launch of a white-labeled Supply Chain Finance (SCF) platform, leveraging CredAble's robust core technology stack. This strategic initiative optimized working capital for large corporates ("anchors") and their dealer/supplier networks. By meticulously orchestrating a seamless integration with the client's ecosystem, including secure ADID integration, we unlocked early payments for suppliers through a multi-faceted approach encompassing invoice discounting and overdraft options. This demonstrably enhanced cash flow and financial flexibility across the entire supply chain. The platform prioritized secure and transparent transactions by anchoring all activities to verified invoices, achieving a significant   improvement in Straight-Through Processing (STP) rate for invoice. This successful launch underscores my proficiency in white-labeling complex solutions, facilitating API-driven ecosystem integration.

- Program Management: Spearhead the orchestration and governance of multifaceted programs, ensuring strategic alignment with organizational imperatives and delivering transformational outcomes.

- Implementation Management: Execute seamless implementation strategies for onboarding new clients and customers, ensuring robust integration, minimizing disruption, and enhancing client satisfaction.

- Team and Resource Management: Direct and mentor a high-performing, cross-functional team, optimizing resource allocation and fostering a collaborative and innovative work environment

- Delivery Management: Oversee end-to-end project delivery, ensuring adherence to stringent quality standards and timelines, thereby surpassing client expectations and achieving excellence.

- Cost Management: Implement rigorous cost management practices, leveraging financial acumen to maintain budgetary discipline, achieve cost efficiencies, and maximize project ROI. Planned vs actual report was exercised to show cases the actual cost of technical resources in various teams and programs been utilized.

- Time Management: Develop and enforce meticulous project timelines, utilizing advanced time management techniques to ensure punctual delivery and mitigate potential delays. Timesheet management was not there. We from the PMO team figured out the best possible product to implement the timesheet in the company system and ensured its executed.

- New Proposals: Author and present sophisticated business proposals, including RFPs (Requests for Proposals) and SOWs (Statements of Work), to capture new business opportunities and drive organizational growth.

- Stakeholder Engagement: Cultivate and maintain robust relationships with key stakeholders, ensuring clear communication, stakeholder buy-in, and successful project outcomes. Both internal and external .
- Risk Management: Identify and mitigate potential risks through proactive risk assessment and management strategies, safeguarding project integrity and ensuring continuity.
- Process Improvement: Champion continuous improvement initiatives, leveraging best practices and innovative methodologies to enhance project management processes and drive operational excellence. Introduced new processes as we were hired to implement processes that did not existed so that execution and delivery can be seamless.
