Techdock Labs

2022 Sept – 2023 Apr

UI/UX Designer

UX/UI design projects for clients across various industries, ensuring the delivery of engaging and user-friendly digital solutions. Conduct user research and testing, usability testing, and user interviews to gather insights and inform design decisions. Create wireframes, prototypes, and high-fidelity mockups to illustrate design concepts and interactions. Continuously iterate and refine designs based on user feedback and evolving project needs while adhering to a design thinking approach.

Projects:

Aqary Click: Affordable and trusted accommodation options

SGT: Security guard tracking system.

Lotus: Online yoga classes and free health consultation application.

Masnikka: Shoes customization and purchase application.
