Experience

Summary

Frontend Developer with 3 years of experience in building responsive and high-performance web applications using React.js, Redux, and modern JavaScript. Skilled in debugging, API integration, and state management. Passionate about creating user-friendly and scalable web solutions. Currently enhancing expertise in cloud-based AI solutions through Microsoft Azure AI-900 certification.

Software Engineer

HCLTech • Lucknow, UP
03/2022 - Present

- Developed **responsive web applications** using React.js, Redux, and Bootstrap, improving UX performance .
- Implemented **API integrations** using Axios and optimized state management, reducing load time.
- Collaborated with backend teams to improve API performance and error handling.
- Built reusable UI components to maintain a **consistent design** across applications.
- Managed bug fixes, testing, and deployment strategies, maintaining a **system stability rate**.

ExpresCargo

Projects

- Developed the UI and optimized state management, leading to a 20% increase in user engagement.
- Integrated API calls efficiently using Axios, improving data fetching speed.
- Implemented responsive design that works across multiple devices.
- https://exprescargo.in/

Foodiverse

Project

- Built a **dynamic cart syste**m using **Redu**x, enabling users to add, update, and remove items with real-time state management.
- Designed and implemented **Login/Register page**s with form validation to simulate basic user authentication.
- Used **React Route**r for seamless, single-page navigation across multiple routes (Home, Menu, Cart, Auth).
- Applied **React Bootstra**p for a responsive, mobile-friendly UI and clean component styling.
- Leveraged **Local Storag**e to persist cart and user data across page reloads.
