Lucknow, UP

FULL STACK DEVELOPER

Dedicated Full Stack Developer with **over 4 years** of experience in building robust, scalable web applications. Skilled in Node.js, Angular, Express, SQL, TypeScript, JavaScript, RESTful APIs, Microservices, and Azure Cloud. Proficient in both front-end and back-end development, with expertise in database design, API development, version control using Git, and deployment to Azure. Adept at delivering user-centric solutions, optimizing application performance, and ensuring high scalability and reliability. Known for problem-solving skills, team collaboration, and expertise across the full development stack.

PROFESSIONAL SKILLS

- **Front-End Development:** Angular, TypeScript, JavaScript, HTML5, CSS3, Responsive Design, UI/UX Optimization
- **Back-End Development:** Node.js, Express, RESTful APIs, Microservices, API Design, Authentication, Authorization
- **Databases:** MS SQL Server, Mongo, Database Schema Design, Query Optimization
- **Cloud Platforms:** Azure, GCP
- **Version Control:** Git, GitHub, GitLab
- **Development Tools:** Docker, Postman, Git Actions, CI/CD Pipelines
- **Operating Systems:** Linux, Windows
- **Software Development Practices:** Agile Development, Scrum, TDD (Test-Driven Development)

WORK EXPERIENCE

Tranzita Systems   **March 2021 - Present**
SDE - 2

- Led the design and development of scalable applications, enhancing organizational efficiency by up to 30%.
- Designed database schemas, created and optimized APIs, and implemented RESTful communication for seamless functionality between front-end and back-end.
- Developed responsive UIs with Angular and TypeScript, improving user experience and engagement.
- Managed version control using GitHub and deployed solutions on Azure Cloud.
- Collaborated with cross-functional teams to ensure timely project delivery.

PROJECTS

Core Planning Tool (WDC/WTP)   *P&G, Mumbai*

- **Objective**: Enhanced demand forecasting accuracy and supply planning efficiency using historical data and advanced analytics.
- **Responsibilities**: Designed database schema, created APIs, implemented RESTful communication, developed responsive UI, and optimized queries. Deployed application on Azure Cloud.
- **Impact:** Improved forecasting accuracy by 25% and streamlined communication between demand and supply planners.
- **Technologies Used:** Angular, TypeScript, Node.js, Express, SQL, Azure Cloud

HRMS (Human Resource Management System) *Wonder Products, Roorkee*

- **Objective:** Automated the full employee lifecycle with modules for recruitment, training, and performance management.
- **Responsibilities:** Led design and development of application, including database schema, API development, and request flow. Managed version control with GitHub and deployed locally using PM2.
- **Impact:** Reduced manual HR processes by 50% and enhanced organizational productivity.
- **Technologies Used:** Angular, TypeScript, Node.js, Express, SQL

CL Management System *P&G, Germany*

- **Objective:** Streamlined management of Change Log (CL) documents in Excel format with role-based access and request workflows.
- **Responsibilities:** Designed and developed the application, handled RESTful communication, optimized queries, and deployed using Azure.
- **Impact:** Enhanced document handling efficiency by 40%.
- **Technologies Used:** Angular, TypeScript, Node.js, Express, SQL, Azure Cloud

RFID Based Asset Management System *P&G, Hydrabad*

- **Objective:** Developed a system to track and manage assets using RFID technology, reducing asset loss and improving inventory accuracy.
- **Responsibilities:** Designed the architecture, integrated RFID scanners with the database, implemented APIs for asset tracking, and created a user-friendly dashboard for monitoring.
- **Impact:** Achieved a 30% reduction in asset tracking time and improved inventory management accuracy.
- **Technologies Used:** Node.js, Angular, SQL, Express

EDUCATION

B.Tech in Computer Science
Dr. A.P.J. Abdul Kalam Technical University
2017-2021

SOFT SKILLS

- Agile Project Management
- Cross-functional Team Collaboration
- Time Management & Deadline-Oriented
- Leadership in Technical Projects
- Effective Communication with Stakeholders
- Critical Thinking & Problem-Solving

CERTIFICATIONS/COURSES

- Full Stack Web Development (MEAN)
- Data Structures
