Summary

A professional software engineer with experience in web design and development with an innovative concept to the next evolutionary phase. Having strong leadership, and technical background. Highly motivated and determined towards achieving goals.

Skills

Languages: JavaScript ,Typescript,,Java(basics), HTML, CSS .

Frontend Frameworks & Libraries:Angular ,React.js, Ionic , Rxjs, NgRx ,Bootstrap, jasmine, amcharts, wijmo grid, ag-grid.

Tools/IDE: VSCode, Swagger, GitHub, GitLab, Git, Eclipse.

Work Experiences

Frontend Developer

Wipro

Dec 2020 - Sep 2023

Vantage

- Create complete Web Application using angular from scratch for organization internal purpose to demo client.
- Developed real time graph to show live changes in data on dashboard using amchart library.
- Create subtitle UI for audio and underline UI for content of playing audio without using NPM.
- Work to get base64 Image from image URL to draw image on screen.

Movie Land

- Create from scratch using angular as a movie watching platform for multiple users with the same account.
- Developed an emoji reacting system while watching movies to take and use user experience on different scenes.
- Create a recommendation option to the user's friend on the same platform.

ITC (Salam)

- Working on Ionic framework using angular to develop mobile app and for web app using angular framework.
- Worked on cookies and local storage to logout users after a particular interval of time.
- Perform manual unit testing for Mobile Application creating apk for Android and IOS.
- Developing collection app for admin and company agent to collect user payment and update user payment status.

Frontend Developer

Dew Solutions

Oct 2023 - Current

IRD

- Created Insights dashboard from scratch to monitor and analyze complex data.
- Created widgets and implemented drag-and-drop functionality using the Gridster library.
- Integrated AmCharts to visualize data using various chart types including graph, pie chart, and donut.
- Migrate the entire project from wijmo grid to Ag-Grid to efficiently display and manage large datasets, enhancing data presentation and analysis capabilities.
- Implemented test suites and specs using Jasmine to validate individual units of code.

NDM

- Created a user admin module allowing users to create and manage their profiles efficiently.
- Developed reports module for a client, enhancing data visualization and analytics capabilities.
- Developed a Content Management System (CMS) module designed to efficiently manage comprehensive product information and link it to contacts. This module facilitates the seamless uploading and management of contracts, enabling streamlined control over overall pricing for product delivery.
- Implemented reusable code components, optimizing development efficiency and ensuring the code consistency for current and future projects.

Other Projects for Wipro

NFT Platform-

- Develop using Angular from scratch as a trading platform in a short time for demo purposes.

CMS Web Portal-

- Create a task to assign a web portal using Ag-grid-angular for internal usage of the team.
- Use Angular framework to develop in a short time period..

Education

B.Tech, Computer Science & Engineering,

Meerut Institute of Engineering and Technology

2016 - 2020
