MOBILE APPLICATION DEVELOPER

HOD.life

Duration : (Feb 2018 - Dec 2018)

The HOD.life app is useful for people in need of instant information, personalized recommendations and actionable advice by trusted health experts, on demand. Busy lifestyle makes us put health at a back seat. If you're someone who looks up for information on symptoms and possible diagnosis online before seeing a doctor, the HOD.life Chatbot has been designed just for users. Instant Home Health Checks, Advanced Lab Tests, Doctor Consultations on Call, Food & Fitness Master classes by some of the best brains in the industry - you name, you get it all on the HOD.life app. Practically speaking, you can find everything to do with your health at a simple swipe on HOD.life

Roles and responsibilities:

- Active involvement in design, coding, new features & tools implementation, lab technical support.
- Monitoring backend process, discussion with product manager for progress updates, technical problems and design issues.

Pizza hut

Duration : (Oct 2013 - May 2014)

Pizza Hut's app is very much like its English-based, Domino's equivalent. Pizzas can be built from scratch, with your own choice of toppings right from within the app itself. However, while Domino's restrict its customizations to just pizzas, Pizza Hut also offers this for their other products, such as choosing a flavor for wings. As you build up your food, an image previews your product in a similar fashion to what is also available in the Domino's app. Pizza Hut also boasts the ability to save your orders so they can easily be reordered at a later date, saving precious me performing all the necessary customizations on a small screen. Additionally, you can save your card information to the app to speed up ordering, meaning that your future cravings will be much simpler to salsify.
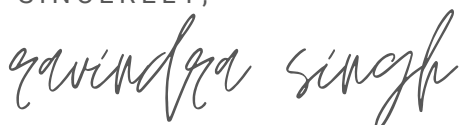

Roles and responsibilities:

- Involving in project effort estimation, technical feasibility study.
- Active involvement in design document creation, coding, design and code reviews.
- Discussion with client for progress updates, technical problems and design issues.
- Unit test case development and execution.

TO WHOM IT MAY CONCERN,

I hereby declare that the above written particulars are true to the best of my Knowledge and belief.

SINCERELY,

ravindra singh
