PROFILE

I have 2+ years of work experience as a MERN Stack Software Developer, proficient in front-end and back-end technologies including JavaScript, React.js, Node.js, Express.js, and AWS. I am skilled in UI/UX design using Figma, and I am knowledgeable in database management systems like MySQL. My goal is to secure an engaging role within a well-regarded organization to further enhance my skills and explore opportunities. Additionally, I possess knowledge of Git and GitHub.

PROJECTS

TpBazzar
Description: TP Bazaar is an e-commerce platform designed for local shop owners and customers in Bhopal. It has three modules: Admin, Retailer, and Customer. Customers can purchase products, retailers can register and add items for sale, and admins manage user roles, product categories, and stock. The site is built with React.js and features role-based routing.
Technologies: Figma, HTML, CSS, Bootstrap, JavaScript, React.js, Next.js, Node.js, MySQL.
Role: Frontend tasks such as UI design, validation, and API integration, as well as backend responsibilities like API creation, validation, authentication, and role management. 🔗

Empower
Description: Employee management systems streamline HR and departmental responsibilities, enhancing collaboration, tracking, and optimizing work hours for business growth.
Technologies: Figma, HTML, CSS, Bootstrap, JavaScript, React.js, Node.js, Git, GitHub.
Role: Frontend tasks such as UI design and API integration, as well as backend responsibilities like API creation, validation, authentication, and role management.

Blog App
Description: The purpose of the Online Blogging System is to automate the existing manual system using fully-fledged software so that valuable data/information can be stored for a longer period with easy access and manipulation.
Technologies: Figma, HTML, CSS, Bootstrap, JavaScript, React.js, Node.js, Git, GitHub.

MediFusion
Description: Created software called Hospital Management System for a hospital, which manages hospital details, and employee details, and allows patients to book appointments and make payments.
Technologies: React.js, Next.js, JavaScript, Tailwind, MySQL, MongoDB, S3 Bucket, ApexCharts, SweetAlert2, Git, GitHub, AWS.
Role: Frontend tasks such as UI design and API integration, as well as backend responsibilities like API creation, validation, authentication, and role management.

SOFT SKILL

Willingness to learn, Problem-solving, Teamwork, Hardworking
