- Sometimes worked independently on a project.

- Following the best practice for project support and documentation as set by the peers Understanding and mapping client's requirements / enhancement to the project; implementing solution that effectively resolve problems and provide improvement

Projects

Project 1	Teladoc (01/2023 to 07/2024)
Description	Teladoc Health provide the Virtual primary care, mental health, and etc between the doctor and patients the connect through the video and audio call according to the consult.
Role	**Android Developer and Team Lead**
Tool	Android Studio
Responsibilities	- Designed and implemented core features for video and audio consultations - Led a team of developers, ensuring timely delivery of project milestones - Integrated APIs for real-time communication and notifications - Conducted code reviews and optimized application performance - Troubleshot critical issues and implemented fixes for seamless functionality

Project 2	Eventur App (03/2020 to 12/2022)
Description	Eventur App Retail to the event management system It's manage the event online and offline, Different type off login user to use the application, User login application with Facebook, UsedFCM for the notification.
Role	**Android Developer**
Tool	Android Studio on Unix
Responsibilities	- Developed modules for user authentication and event scheduling - Implemented FCM notifications for real-time updates - Optimized UI for multiple device resolutions and screen sizes - Debugged issues and provided regular updates during the project lifecycle

Project 3	Training Amigo (10/2018 to 01/2020)
Description	Training Amigo fitness Retail Application, That application calculates the user fitness activityand display on the application, It's connected with the different fitness device like Streva, Samsung Health Device etc. Provide the fitness tips Videos Used the censor to calculate the steps.
Role	**Android Developer**
Tool	Android Studio
Responsibilities	- Integrated third-party APIs for fitness tracking devices - Designed and implemented video playback functionality for fitness tips - Ensured compatibility with diverse fitness devices and sensors

Project 4	**UPL (09/2017 to 10/2018)**
Description	UPL Retail farmer Application, That application provides the spraying functionality farmer Different type off login user to use the application.
Role	**Android Developer**
Tool	Android Studio
Responsibilities	• Developed and implemented user authentication and role-based access controls • Designed user-friendly interfaces to simplify the user experience for farmers • Worked closely with the backend team to integrate APIs for spraying functionalities • Tested and debugged the application across multiple Android versions

Project 5	**Incuto (10/2016 – 08/2017)**
Description	Incuto Retail Banking Application that provides the user details in the application and provides the Loan balance with the different type of loans on the screen and provide the communication functionality with the Notification.
Role	**Android Developer**
Tool	Android Studio
Responsibilities	• Developed and maintained modules for account and loan management • Integrated push notifications for real-time updates on loans and accounts • Designed and optimized layouts for data-heavy screens

Personal Details

Name	Satish Kumar
Address	At-Bahuara, Post-Krishanwara, Dist-Vaishali
Date of Birth	17-10-1992
Nationality	Indian
Passport	N8384460

Declaration

I hereby declare that the above given information is true to the best of my knowledge.

Date:

Place: Pune   Satish Kumar
