EXPERIENCE

Digital Business Card - Mern Stack Developer
RedInk

📅 Nov 2023 – Present 📍 **Gurgaon, India**

- Worked on the DashBoard, Navbar, and Routing of Website.
- Collaborated with the team on the **design, development, and integration** of features to enhance user experience.
- Developed and integrated **RESTful APIs** using **Node.js** for handling form submissions, data storage, and retrieval of digital card information.
- Designed and optimized **MongoDB schemas** to store user profiles, business details, and card templates, ensuring efficient data retrieval and scalability.

AffableBPM
RedInk

📅 Jul 2022 – Oct 2023 📍 **Gurgaon, India**

- Designed and implemented pages such as User Profile , Activity , and Subscription using **React.js**, ensuring an interactive and responsive user interface.
- Optimized **User Experience** by ensuring seamless navigation and compatibility across devices.
- Collaborated with the **Backend** team to create and use **RESTful APIs** for handling user activity data and improving scalability. Contributed to the platform's overall functionality and usability by working across both **Frontend and Backend** components.
- Tech Stack: **React. Js, JavaScript, Node. Js, Express, HTML, CSS, Bootstrap, MongoDB**

TECHNICAL SKILLS

- **Programming Languages**
  - **Javascript**, **Java**
- **Frameworks & Libraries**
  - **ReactJS**, **NodeJS**
  - **Express**
  - **HTML**, **CSS**,
  - **Bootstrap**, **Tailwind**
  - **MongoDB**
- **Version Control**
  - **Git**, **Github**
- **Other Tools**
  - **Eclipse**, **VS Code**
  - **Postman**, **Vercel**

EDUCATION

B.E. (Mechanical) - 8.15 CGPA
SPPU University

📅 2018 – 2022 📍 Pune, India

HSC - 72.46%
Vivekanand College

📅 2018 📍 Aurangabad, India

SSC - 86.80%
St. Xavier's School

📅 2016 📍 Georai, India

PROJECTS

User Management CRUD Application
- **React.Js | Node.Js | Express | JavaScript | MongoDB**
- Developed a full-stack web application for managing users with functionality to **Create, Read, Update, and Delete (CRUD)** user records
- In this app I have used **NodeJs** as the **Backend** technology to fetch the data from **Databasse**
- Tested API endpoints with **Postman** for functionality and error handling. Github

Country Flags Display Application
- **ReactJs | HTML | CSS | JavaScript**
- Designed and developed a **React.js** application to fetch country data, including flags, from an external API.
- Displayed country flags in an interactive, responsive card layout for an intuitive user experience.
- Utilized **useState** and textbfuseEffect hooks for efficient state management and API integration. Github

Snake Game
- **HTML | CSS | JavaScript**
- In this app we have used basic **JavaScript** to design the moment of the snake
- **HTML and CSS** have been used to design the layout of the app
- Music component has been added to the app to make it more interesting Github
