shubham97172@gmail.com

Started as an Android Developer in February 2022, dedicated to crafting innovative mobile apps and leveraging cutting-edge tech for seamless user experiences in a professional environment.

Academic History

ITS Engineering College

B-Tech -CSE (2018-2022)

Technical Skills

- Kotlin , Java ,Compose
- MVVM
- Compose ,Room DB ,
Dagger/Hilt
- REST APIs
- Firebase
- Git
- Version Control
- Play Store Submission
- Web Socket

Familiar With

- MVI
- React Native
- Clean
Architecture

Tools

- Android Studio
- VS Code
- Firebase
- Design tools (Figma)
- JIRA, Postman, Swagger

Personal Project

Music App - Compose [URL](#)

- Created a music app with MVI, Jetpack Compose, and Room DB for playlists and album views.

Github

Experience

Appinventiv Technology Pvt. Ltd

Feb, 2022 - Present

Software Engineer - Android

Kudu - Food Delivery App

[URL](#)

- Contributed to a food platform with over 5L+ Play Store downloads, delivering a smooth and engaging user experience.
- Built a seamless menu-browsing interface, enabling effortless food discovery and selection.
- Designed an address module using the Places API, reducing manual input by 20% and improving user efficiency.
- Developed reusable view components with data binding, accelerating UI development and optimizing app performance.
- Utilized Kotlin, MVVM, XML, Google Maps, Data Binding, Coroutines, Retrofit, and Firebase to build and enhance the application.

Ecco - E-commerce

[URL](#)

- Implemented a repository pattern to decouple domain and data layers, improving maintainability and architecture.
- Added pagination to product listings for smooth scrolling, reduced data usage, and better performance.
- Designed a wishlist module using Room Database, significantly improving data retrieval speed.
- Developed comprehensive test cases with Mockito and JUnit, reducing bugs by 30% and enhancing reliability.
- Tech stack: Kotlin, MVVM, XML, Coroutines, Firebase, Dependency Injection (DI), Retrofit, Push Notifications.

Hemmings - Marketplace for Car Enthusiasts

[URL](#)

- Designed advanced filtering and sorting for vehicle listings, enabling seamless search refinement.
- Added the ability to save customized search criteria, enhancing user convenience with tailored searches.
- Developed an Auction and Make Offer program to simplify vehicle buying and selling on the platform.
- Tech stack: Kotlin, MVI, Jetpack Compose, XML, Data Binding, Coroutines, Retrofit, Firebase.

Mentor

- Mentorship to 6 trainees in Android from scratch, doubt resolution, one-to-one guide.
- Sessions on Parcelable & Serializable, MVVM, Firebase, JetpackCompose.
- Leading development of Hemmings App.
