Summary

A versatile IT graduate and proficient Android developer with more than 2+ years of experience in the development of Android applications using Kotlin and Jetpack Compose. Recognized for delivering innovative and user-centric solutions, I offer a strong blend of technical expertise and effective communication skills. As a dedicated team player, I am committed to delivering high-quality Android applications and thrive in challenging environments.

Work Experience

Mindstix Software Labs Pvt Ltd | Android developer

Nov 2022 – Present

Project - Amway Healthy Home

Healthy Home is a mobile smart home application that seamlessly integrates and manages air and water purifiers, enabling users to take control of their devices. Real-time monitoring of device performance, health statistics, warranty details, and replacement part updates. Integrated a resource library for device information, tips, and tools, enhancing user convenience and engagement.

Key Responsibilities

- Designed, developed and maintained high-quality Android applications using **Kotlin**, adhering to Android best practices and implementing architectural patterns like **MVVM and clean architecture**.
- Collaborating with **product, design, and QA teams**, collecting requirements and delivering superior software solutions with a focus on seamless user experiences and timely project delivery in **Agile environments**.
- Led the development of a mobile application for managing **smart IoT devices**, integrating real-time control, health monitoring, **multilingual CMS support**, and scheduling features to enhance global user accessibility.
- Fostered **communication with clients**, gathering requirements effectively and addressing emerging issues promptly to ensure project success.
- Successfully integrated third-party APIs and libraries, including **RESTful API and JSON-based** data management, to expand the functionality of the app while ensuring optimal performance and scalability.
- Actively contributed to **code reviews** and managed the **Google Play Store release process**, ensuring high-quality, bug-free applications.
- Continuously enhanced technical expertise by staying up-to-date with the latest trends in **Android development**, including **Jetpack Compose, Kotlin Coroutines**, and asynchronous programming, to drive innovation and efficiency.

Technical Skills

- Programming Languages:** Kotlin, Python,
- Framework:** Jetpack Compose
- Architectural Pattern:** MVVM, Clean Architecture
- Networking:** REST-API, Retrofit.
- Others:** Kotlin Coroutines, SQL, Git/GitHub, HTML, CSS

Achievement

Project - GlowAI

Developed **GlowAI**, an AI-powered skincare app that provides personalized beauty solutions by analyzing individual skin conditions. The app offers **AI-driven skin analysis** for concerns like acne, dryness, and wrinkles, along with tailored product recommendations based on unique user needs. It generates **customized skincare routines** morning and evening, tracks skin progress over time, and adjusts recommendations accordingly. Additionally, GlowAI provides **weather-based skincare tips**, ensuring users receive timely advice to optimize their routines based on real-time conditions.

- Secured **2nd place** out of 120+ teams at the **International Hackathon** organized by Belcorp for developing an innovative Android application focused on beauty-related products.

Education

Graduation

- Vishwakarma Institute of Technology, Pune

Aug 18 - Jul 22

GPA: 8.38/10
