Yash Anand

Frontend Developer

"Frontend Developer with 1.8 years of experience in creating high-quality, user-focused websites. Skilled in HTML, CSS, JavaScript, Bootstrap, and React.js, I design responsive, intuitive interfaces optimized for performance. Currently expanding my expertise in React.js and PHP to build more interactive, scalable applications."

PERSONAL PROJECTS

Mooncart
- "I've created eCommerce websites using Bootstrap and JavaScript, allowing users to easily track their orders. These platforms enable online buying and selling, featuring product catalogs, shopping carts, secure payments, order tracking, and user feedback mechanisms. They're designed to deliver a seamless and secure shopping experience."

Tirth Holidays
- I have designed and developed a sophisticated travel website that effectively showcases amenities and experiences. My role involved front-end development using HTML, CSS, JavaScript, and frameworks like Bootstrap. Focusing on navigational ease and visual appeal, I integrated interactive elements and ensured a responsive design to enhance user experience.
