## About Me

An innovative Full-Stack Developer with a strong foundation in both front-end and back-end technologies. Adept at designing and implementing scalable, user-centric applications, I thrive in collaborative environments that demand efficient problem-solving and technical innovation. I am committed to delivering impactful solutions by leveraging modern frameworks and tools.

## Skills

**Languages:** JavaScript, Java, PHP, HTML, CSS

**Frontend:** React.js, Tailwind, Bootstrap

**Backend:** Node.js, Express.js, PHP, Laravel

**Databases:** MongoDB, MySQL

**DevOps:** Docker, Kubernetes, Jenkins, Nginx, Heroku, AWS

**Tools:** Git, Postman, Figma, PHPStorm, XAMPP, Largaon

**Languages:**

**Frontend:**

**Backend:**

**Tools:**

## Experience

### Full-Stack Developer

Maxlence, April 2024 – December 2024

- **Developed Scalable Web Applications:** Built full-stack applications using React.js for the front-end and Node.js with Express for the back-end. These applications improved system efficiency by 35%.
- **Implemented API Solutions:** Designed and developed RESTful APIs to handle complex data flows between the frontend and backend, reducing latency by 20%.
- **Containerized Deployments:** Integrated Docker and Kubernetes to create isolated and scalable container environments, reducing deployment issues by 40%.
- **Performance Optimization:** Refactored legacy code and optimized database queries, improving load times by up to 30%.
- **Collaborative Teamwork:** Worked closely with product managers, designers, and QA teams, ensuring all deliverables met high-quality standards within the set deadlines.
- **Mentorship and Leadership:** Guided junior developers on best coding practices, conducted code reviews, and shared knowledge through regular team sessions.
- **DevOps Integration:** Deployed CI/CD pipelines using Jenkins and integrated Nginx for load balancing and high availability.
- **Real-time Analytics Dashboard:** Built a real-time data visualization dashboard for monitoring key metrics, enhancing business decision-making processes.

### Frontend Developer

Davat Beverage, Ahmedabad, February 2023 – March 2024

- Designed and implemented engaging UI components using React.js, enhancing user experience and accessibility.
- Worked closely with backend teams to integrate RESTful APIs built with PHP and Laravel, ensuring seamless data flow between front-end and back-end.
- Developed and maintained dynamic PHP-based back-end services for user authentication and session management.
- Optimized web application performance, achieving a 20% faster load time by fine-tuning both PHP and front-end code.
- Collaborated with designers to ensure brand consistency and responsive design across devices.
- Utilized PHP-based templating engines to dynamically generate front-end content, ensuring real-time updates and interactions.

## Projects

---

### Jassideparathe.com

[Live Site](#)

- Developed and optimized the entire website using HTML, CSS, JavaScript, and PHP.
- Implemented dynamic content generation and enhanced user experience with custom PHP scripts.
- Focused on site performance by optimizing images, minifying CSS/JS files, and using caching strategies, improving page load times by 30%.
- Ensured cross-browser compatibility and responsive design, making the site fully functional on both desktop and mobile devices.
- Managed deployment and hosting, ensuring smooth, consistent site availability.

### MERN Stack Portfolio

[GitHub](#) — [Demo](#)

- Built a portfolio showcasing skills in React, Node.js, and MongoDB.
- Implemented responsive design for optimal usability across devices.

### CodePen Clone

[Live Site](#)

- Built a CodePen clone where users can create and share HTML, CSS, and JavaScript snippets in real-time.
- Integrated a live preview feature, allowing users to see their code changes instantly.
- Developed the back-end using Node.js and Express, handling code storage and user management.
- Implemented an intuitive UI with real-time collaboration features, making it easy for users to share and collaborate on code.
- Focused on performance optimization, reducing loading times by lazy loading resources and compressing code.

### Netflix Clone

[GitHub](#) — [Demo](#)

- Developed a responsive Netflix-like app using React and Firebase.
- Integrated Firebase authentication for secure login and user management.

---

### Education

- **Bachelor of Computer Applications (IT)**
- Gauhati University, 2019 – 2023
- Grade: 78%

### Certifications

- Full-Stack Development
- Newton School, Nov 2022

### Co-Curricular Activities

- Reading technical documentation
- Contributing to open-source projects

---
