Summary:

3.3 Years of total software development experience in the fields of Android-Kotlin ,
Flutter application development, and User Interface Designing for many live projects.
Flutter developer using Material 3, DART
Platform. Android-Kotlin developer Mobile & OTT
Platform.

Skill Set

| | |
|-----------------------|-------------------------------|
| Expertise | : Kotlin, JAVA , Flutter, XML |
| Development Tools | : Android studio, Android SDK |
| Architecture patterns | : MVVM , MVP |

Key Responsibilities:

- ☐ Worked on developing applications using Flutter framework using Material 3, DART Platform.
- ☐ Worked on Leanback Library, Electronic Program Guide, Custom UI designing for OTT application, MVVM, Firebase, Restful API integration
- ☐ Providing effective and functional designs to customers that met their specific business/personal needs. Working directly with customers to establish project scope, interaction guidelines and project time line. Performed routine updates, upgrades and overall maintenance of application.
- ☐ Design and build advanced applications using Flutter, Kotlin.
- ☐ Developed Production apps in Kotlin.
- ☐ Designing Creative UI Screens layouts using XML for Mobile applications.
- ☐ Solid Understanding of Full Mobile Application Development Cycle.
- ☐ Developing Applications for Wide Range of Device's and Screen sizes.
- ☐ Rest API's integration Using Networking Libraries such as HTTP URL Connection and Retrofit.
- ☐ Expertise in using version control integration tools such as Git.
- ☐ Integrated Payment Gateway's such as razor pay.
- ☐ Publishing and maintaining applications in play store.
- ☐ Integrate with third-party APIs and services.
- ☐ Integrating Push notifications with firebase.
- ☐ Participating in code reviews
- ☐ OTT Platform using Leanback Library.
- ☐ Having knowledge in Exo-player for Videos.
- ☐ Object-oriented programming concepts.
- ☐ Using UI/UX design principles.
- ☐ Performing unit testing and integration testing

Portfolio:

Projects in Claysol Media Labs:

#1. Dor Tv Launcher :

Description:

Dor Tv Launcher is a Launcher Application that developed in Android OTT Platform. Provides the user to use some ThirdParty applications (Ex:AmazonPrime , Netflix , Disney etc.) , News , Games , through the launcher .

INDUSARASWATHIKOYELADA

Features / Component developed

- ☐ MVVM Design Pattern with Exo-player for streaming HLS content.
- ☐ Retrofit for network request
- ☐ Clean architecture
- ☐ Worker manager
- ☐ Navigation Components to navigate between fragments, Dependency injection, Room database of offline caching of data

#2. UGC Snipitz Project

Project

Description:

It is a User Defined Content posting App designed in Flutter for the client Snipitz for both Android and iOS Mobile users.

Responsibilities:

Worked on Dashboard, Campaign Gallery, App Bar, Campaign home Page, Campaign Detail Screen, User Profile, Memory and Reward sections, Campaign chart, Notifications etc.

#3. ABP News Live

ABP News Live is an android based TV application designed exclusively for Live news, Latest, Trending news and entertainment purpose.

Responsibilities:

ABP Network creates fearless content across broadcast, television and digital . This Supports platforms like JIO STB, Mi TV, 1+, Google(playstore) , firestick.

I have worked on features like .Onboarding screen, Electronic Programme Guide(EPG), GA:Events passing, Live TV broadcasting, Uncut, Banner and Rail section.

Previous Projects

Project: 1

Project Name : Sthree (Education Application)

Technology : Kotlin, XML

Team Size 2

Project Description:

STHREE is an android based mobile application designed exclusively for Students of Architecture.

Play Store Link : <https://play.google.com/store/apps/details?id=com.sthree.ecourse>

Project: 2

Project Name : Drona Study centre (Education Application)

Technology : Kotlin, XML

Team Size 2

Project Description:

Drona Study Center is an android based mobile application designed exclusively for Students.

Students are can purchase mock tests and study materials for their preparation.

Play Store Link : https://play.google.com/store/apps/details?id=com.drona_study

INDUSARASWATHIKOYELADA

Project: 3

Project Name : Satyam Academy (Education Application)

Technology : Kotlin, XML

Team Size 2

Project Description:

Satyam Academy is an android based mobile application designed exclusively for Students. Students can purchase subscription-based Study materials and Concept based Videos for their preparation.

Play Store Link : <https://play.google.com/store/apps/details?id=com.satyam.academy>

Project: 4

Project Name : SM Communications (Education Application)

Technology : Kotlin, XML

Team Size 2

Project Description:

SM Communications is an android based mobile application designed exclusively for Agents to recharge the fast Tags.

Play Store Link : https://play.google.com/store/apps/details?id=com.sm_communications

Project: 5

Project Name : Lazaro (Food Application)

Technology : Kotlin, XML

Team Size 2

Project Description:

Lazaro is an android based mobile application designed exclusively for food orders.

Play Store Link : <https://play.google.com/store/apps/details?id=com.lazaro.app>

Work Experience:

- ☐ **Claysol Media Labs Private Limited: 2.1 years**
Worked as an Android-Kotlin developer in OTT Platform, with features / components like Leanback Library, Electronic Program Guide and Custom UI designing for OTT application, MVVM,MVP , Firebase, Restful API integration and so on.
- ☐ **Colour Moon Technologies : 1.2 years**
Worked as an Android-Kotlin developer in mobile application development by using MVVM architecture, firebase, retrofit network call-backs in kotlin technology.

Academic Qualification:

- ☐ **M. Tech (CST) |** BABA Institute of Technology and Sciences with 68% in 2021.
- ☐ **B. Tech (CSE) |** ISTS for Women, Rajahmundry with 79% in 2017.
