PROJECT

E-Commerce Application :VFLS

Technologies Used:

- Frontend: Ionic, Angular
- Backend: Node.js, Express
- Database: PostgreSQL

Project Overview:

Developed a comprehensive e-commerce platform using a robust technology stack, including Ionic, Angular, Node.js, Express, TypeORM, and PostgreSQL. This project features an intuitive user interface for customers, an admin panel for managing products and orders, and a customer support panel for handling inquiries and support requests.

Responsibilities:

- Designed and implemented the frontend using Ionic and Angular, ensuring a responsive and engaging user experience.
- Developed the backend API with Node.js and Express, utilizing TypeORM for seamless database interactions with PostgreSQL.
- Set up and managed the PostgreSQL database, ensuring data integrity and efficient querying.
- Built the admin and customer support panels to facilitate comprehensive management and support functionalities.
- Collaborated with cross-functional teams to gather
