OBJECTIVE

As an experienced Full Stack Developer with 3 years in the field, I specialize in backend development, complemented by front-end technology skills. I aim to leverage my development and problem-solving expertise to contribute to innovative solutions in a dynamic team environment.

EXPERIENCE

• Wipro (Karnataka Bank)   *Oct 2022 - Present*
Full Stack Developer   Bengaluru, Karnataka

  ◦ Implemented RESTful API architectures, ensuring efficient and consistent communication between clients and servers. Collaborated with frontend developers to understand client requirements and provide effective API solutions for their applications.

  ◦ Designed and implemented a centralized logging system that improved debugging efficiency by 40% and helped identify performance bottlenecks.

  ◦ Utilized SQL for data manipulation, including writing complex queries to insert, update, and delete records related to loan applications, user profiles, and transaction history. .

  ◦ Designed and implemented reusable React components to create a modular architecture, enhancing maintainability and scalability of the application. Utilized React's state management features (such as hooks) to manage application state efficiently, ensuring real-time updates and seamless user interactions.

  ◦ Implemented user authentication and authorization features, securing sensitive loan application data and ensuring compliance with security standards.

  ◦ Maintained high standards of code quality through code reviews, best practices, and adherence to industry standards, ensuring a robust and maintainable codebase.

• Wipro (Amdocs)   *Aug 2021 - Sep 2022*
Project Engineer   Pune

  ◦ Conducted regular health checks and performance monitoring of APIs, ensuring optimal functionality and rapid resolution of any system downtime or disruptions.

  ◦ Acted as the first point of contact for handling and resolving incoming service requests, incidents, and system issues within agreed SLA timelines.

  ◦ Oversaw the automation of routine tasks and scheduled jobs, ensuring smooth execution and troubleshooting any issues in automated processes to improve operational efficiency.

  ◦ Managed and executed SQL queries for database-related requests, including performing updates, modifications, and data retrieval, while ensuring data integrity and consistency.

  ◦ Participated in all phases of the SDLC and agile methodologies, including SCRUM, improving project delivery efficiency by 15% .

EDUCATION

• Galgotias University   *Aug 2017 - May 2021*
Bachelor of Technology   Greater Noida, Uttar Pradesh

  ◦ CGPA: 8.04

• Rajkiya Sarvodaya Bal Vidyalaya   *Apr 2017*
12th Standard   Delhi

  ◦ Grade: 71.4

SKILLS

• Programming Languages: JavaScript , Java

• Front-End Technologies: React.js , HTML5 , CSS3 , Next.js

• Back-End Technologies: Node.js , Express.js , RESTful APIs

• Database Systems: MySQL, PostgreSQL , MongoDB

• Other Tools & Technologies: Visual Studio , Excel , Dbeaver , JIRA

ADDITIONAL INFORMATION

Languages: Hindi (Native Proficiency), English (Professional Working Proficiency)
Interests: Travelling , Chess , Badminton
